GMC

HUMMER

BY

Katzkin

Katzkin.

In 1983, Mitchell Katz began distributing high quality leather hides to trim and conversion shops throughout the United States. Using uncompromising standards, it wasn't long before Mitch gained a reputation as a source for superior leather. He soon discovered that the demand for leather automotive interiors was suppressed by the expense of having seat and door panel covers customized. Thus was born Katzkin.

With the same commitment to quality, Katzkin designed seat and door panel covers that became direct replacements for factory cloth and vinyl. This allowed auto dealers to offer top quality leather at an affordable price, which meant that everyone could enjoy the luxury of leather, not just the owners of high-priced luxury automobiles.

Now, 23 years later, Katzkin is the industry's leading aftermarket leather interior manufacturer, with over 2500 authorized installers nationwide, offering more than 2000 interior patterns. All those patterns can be ordered in a variety of two-tone combinations in more than 95 colors and materials with available options such as piping, contrast stitching, perforation, and custom embroidery.

At Katzkin, there's no end to the possibilities.

KATZKIN LEATHER INTERIORS IS PROUD TO OFFER A GENERAL MOTORS SPO OFFICIALLY LICENSED PROGRAM.

Customers want to personalize their vehicles. Converting a vehicle that currently has fabric to a luxurious leather interior with GM Trademark Emblems is an excellent marketing and design option. Katzkin has been manufacturing leather interiors since 1983 and now Katzkin kits with GM trademarks are a GM Official Licensed Product.

Katzkin Authorized Installation Facilities install thousands of leather interiors every month.

A KATZKIN LEATHER INTERIOR IS WHAT CONSUMERS WANT!

- The ability to personalize a GM vehicle.
- The flexibility to add a leather interior, with a GM Trademark, to an option group that does not include leather.
- The opportunity to add leather when NO OPTION for leather exists.
- The choice of any of the unique “Katzkin Packages”.

Now is the perfect time to add a leather interior with a General Motors Trademark. Katzkin leather interiors add gross profit to sales and help sell vehicles faster while giving the consumer EXACTLY what they want!

SAFETY IS OUR TOP PRIORITY!

In the early 1990's, Katzkin took the lead in our industry by being proactively involved with safety issues. We began by ensuring that the construction of our seat covers provided for the proper deployment of side impact airbags. As part of this process, we initiated both in-house and independent testing of our covers. These tests demonstrated that our covers, when properly installed, did not interfere with the operation of the side impact airbags.

Katzkin then set an industry precedent by backing our product with a \$51 million product liability insurance policy, issued by the world's highest rated insurance company.

In 2002, we began researching and testing our interiors for the impending new federal regulation requiring the introduction of Occupant Classification Systems (OCS). Again, testing showed that our interiors, when properly installed, did not interfere with the operation of the Occupant Classification System. Before the year was over, we created our Katzkin OCS Manual, a guide to understanding these new safety systems.

As of today, we are the **ONLY** aftermarket leather interior company approved by a major OE manufacturer for installation of our covers on their vehicles equipped with OCS. And we continue to test our product using the top independent research laboratory in the country – the same lab that the OE's and the National Highway Traffic Safety Administration use.

At Katzkin, we take safety seriously. You should too.

KATZKIN LEATHER INTERIORS

SEAT HEATER

WARMING IT UP!

No other seat heater in the industry gets as hot as the Carbotex Seat Heating System manufactured by WET. According to officials at WET, the actual carbon fiber filaments within the unit reach an amazing 70 C / 158 F. This means the occupant experiences a comfortable seat-surface temperature of between 40 C/104 F and 45 C/ 113 F.

This unit, which meets OEM specifications and testing requirements, has better heating capabilities than our previous seat heater. The standard control unit has temperature sensors in its 11"x 22" heating pad, with a high setting that gives you a fast full power warm-up and the low setting for soothing warmth.

Suedezkin

Nothing compliments Katzkin's supple leathers like the softness and style of Suedezkin. And for an added touch of luxury, Suedezkin looks great perforated. Because this synthetic suede has been our most frequently ordered two-tone accent material, we've now expanded our selection to include these 15 unique colors.

auto style Exotics

When leather isn't enough to give your automotive interior that unique look, Katzkin's AutoExotics are the answer. For example, try the look and feel of ostrich and crocodile which have been simulated on genuine cow hide. Or, for a more contemporary look, you can accent your two-tone with our synthetic Carbon Fiber and Machined materials.

Tuscany

In 2004, Katzkin introduced Tuscany, a leather softer and more luxurious than any leather ever offered for automotive use. Available at first in only four colors, Tuscany elevated opulence to decadence, but the demand for this "one-notch-higher" luxury was overwhelming. Katzkin is now pleased to offer Tuscany in these 14 rich colors.
